**Re: Work Project No. - BR1334 - Hydro Pole Relocation
at Lanz Bridge, Township of West Grey
Concession No. 2 WGR, North of Hwy 4**

We have emailed drawings pertaining to the above describing the work project with existing utilities and anticipated conflicts, based on our initial preliminary design review.

We propose to hold a site meeting at your earliest convenience to discuss site details with the Township. Please let us know when you or your site representative is available to meet.

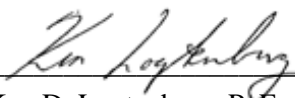

Please examine the plans that have been sent for corrections or omissions, and conflicts with proposed construction. After the site meeting, you will be requested to prepare your proposed relocation design and return sets of plans to our office by early July.

Your submission will require a preliminary cost estimate for the client to review. It is anticipated a Moving of Utilities (MOU) will be issued as soon as possible. To comply with the client's timeline for the project, it is hoped that the utility relocation work will be completed by the end of August 2021. Please advise if these dates are attainable.

Enbridge has a gas line going through the site, and we have been in discussion with them. Their line is a significant distance away from the hydro poles to be relocated on this project.

Yours very truly,

B. M. ROSS AND ASSOCIATES LIMITED
