

Public Input for
Schedule C EA (Phase 2)
for Upgrading of Durham Water Works
Municipality of West Grey

December 5, 2022

22-037

Comment Sheet

Background

The Municipality of West Grey's Durham Water Works (WW), in its existing condition is approaching the rated capacity of the treatment plants permitted by the drinking water works Licence and permit. Furthermore, the existing water supply well(s) yield is on the decline, thereby threatening availability of water supplies in sufficient quantity. The municipality is obligated to search for methods to increase water supply capability and rated capacity of water works in order that the water works can continue to supply potable water meeting Ontario Drinking Water Standards to water consumers.

Question and Comments

Question 1 Do you agree that this project is needed? Please indicate why or why not?

Question 2 Construction and testing of a new ground water supply well has been identified as the **Preliminary Recommended Alternative Solution**. Do you agree with this solution? Is there any other information that should be considered?

Question 3 Is there any other information or comment that you would like to provide or be considered in the EA process?

Question 4 You are: (check all those that apply):

_____ Resident of West Grey (please specify town/village)_____.

_____ Member of an Interest group (Please specify)_____.

_____ Agency Representative (Please specify)_____.

_____ Other (Please specify)_____.

Thank you for participating in this study.

Please return this completed Comment Sheet to Municipal Office to the attention of Mr. Brent Glasier by **January 6, 2023**.
