

Notice of Study – Durham Creek Floodplain Mapping Update

The Project

Saugeen Valley Conservation Authority (SVCA) has initiated a study to update the regulatory floodplain mapping for Durham Creek in partnership with the Municipality of West Grey and D.M. Wills Associates Limited. You are receiving this notice as your property has been identified as having a bridge or culvert on or near Durham Creek that needs to be measured and surveyed as part of this study. The study area is generally outlined in Figure 1.

The Process

Qualified staff will visit the property to measure and survey the bridge or culvert between July 4, 2023, and July 7, 2023 during regular business hours (8:00 am to 5:30 pm). Staff will be clearly identifiable by high visibility clothing and will be able to provide identification if requested. Your presence is not required during this survey; however, you are welcome to observe. If you have any questions, comments, or specific requests please contact one of the Project Managers listed below.

How to Participate

Residents and interested community members will be invited to attend a Public Information Centre to review the draft results of the study in the Fall/Winter of 2023. The location and time of the Public information Centre will be advertised on the SVCA and West Grey websites when they are determined.

For more information

Members of the project team are available to answer questions regarding the project.
